I have the fingerprint on a Genesys SmartCard, on my vista 32-bit. I am able to use it on my XP. A: I think you should be able to find a solution for your problem. The MSI File that you downloaded is signed by a company called Q-Go and it is signed by them in order to not provide viruses and spyware to the user. To verify this you can go to the Microsoft website ([www.microsoft.com/mscorp/mscorlib](http://www.microsoft.com/mscorp/mscorlib)) and enter mscorlib in the Search box on the top left hand corner of the page. If the signature is intact then your MSI file should work. Link to more information on the MSI File and it's signature: If the signature is not intact, then the MSI file might be an executable file or virus. You should not install it. Hope this helps! . AirPods Pro The Baby's Fun Free Big Big Bugs AirPods Pro The Baby's Fun Free Big Big Bugs The Baby's Fun Big Big Bugs Watch now online on Cartoon Network.com. Showing now on Adult Swim. When a baby gorilla, a bear cub, a very large penguin, and a big friendly giraffe are accidentally left on the island of Babyzilla Island, they accidentally knock over a vase. This knocks a radioactive vase into the water, which of course causes the island to turn into a monster. It has been a few years since the circus left, but they are back for a special visitor, Little Tocky from Babyzilla Island.
