The agency says US crude output hit 11.62 million barrels per day in December, a new record, and set a new record for the third straight month in a row. That's about 8 million barrels more than analysts expected. It's also a 26% increase over the 10.5 million barrels a day that were produced in December 2011. The agency said it expects US crude production to remain stable in the next three months, then drop slightly in the fourth quarter of 2013. US crude oil output has not been higher than 11.6 million barrels a day since the 1980s, the agency said. The agency predicts that crude oil production will average just below 12 million barrels a day next year and rise to 12.3 million in 2014. That would be the highest level since 1970. "Recent industry forecasts... suggest that both 2012 and

mouse combinations. The reason it's strange is that normally hotkeys are relative to the window you are in,
but in this mod it is relative to the current game window (not the window you're currently in) For
example: If you have a game window and you press ctrl + c, it will close the window. If you are playing
the game and press ctrl + c, it will close the game window (meaning you are no longer in the game). If you
have the game window and you press ctrl + c, it will open the console If you have a game window and you
